

## The Representative Democracy Data Archive (REPDEM)- Party dataset

This comparative dataset builds on previous datasets (Andersson et al, 2020; Bergman et al, 2019; Bergman et al, 2021; Bergman et al, 2024; Hellström et al, 2021; Strøm et al, 2008), and has been updated in-house to cover additional years, and also includes additional countries vetted by country experts. The dataset provides detailed information on parties represented in 33 parliamentary democracies from 1945 (or their democratic transitions) until mid-2025. The parties are nested in the cabinets present in the Representative Democracy Data Archive (REPDEM) - Basic government datasets.

### How to cite

When using these data, please cite the following:

### Structure of the codebook

The following sections each contain detailed information on

- the name of the variable as it is defined in the dataset,
- the label briefly describing the variable,
- the attached value label,
- relevant additional information on specific coding decisions (where applicable),

For several variables, such as the partisan composition of the cabinet, the information is given using party abbreviations and/or party IDs. Please refer to the corresponding *Party codebook*
